Bijlage Grade Evidence Profiles - Herkennen en verkennen

Kwaliteitsbeoordeling									Effect	Kwaliteit
Aantal studies	Studieopzet	Risk of bias	Inconsistentie	Indirect bewijs	Onnauwkeurigheid	Andere factoren	Aantal patiënten			
							Interventie	Controle		
Aandacht van zorgprofessionals voor spirituele/existentiële behoeften										
1	Quasi-experimenteel	Ernstig[a]	Niet te beoordelen[b]	Niet ernstig[c]	Ernstig[d]	Geen	24	61	Ervaren aandacht voor spirituele / existentiële behoeften (0–10): interventiegroep 7,9 (SD 1,8) vs. controle 5,9 (SD 3,2); p=0,008	ZEER LAAG

[a] Geen randomisatie en geen blindering (mogelijke vertekening door confounding).
[b] Eén studie, geen vergelijking tussen studies mogelijk.
[c] Populatie, interventie en uitkomst komen overeen met de onderzoeksvraag.
[d] Kleine steekproef (n=85), betrouwbaarheidsintervallen niet gerapporteerd, onzekerheid over de exacte effectgrootte.
