

**Uitgangsvraag 1: Psycho-educatie** Wat zijn de effecten van psycho-educatie in vergelijking met geen psycho-educatie op vermoeidheid, kwaliteit van leven en (fysiek) functioneren bij patiënten met vermoeidheid bij kanker in de palliatieve fase?

**Patiënten** Patiënten met vermoeidheid bij kanker in de palliatieve fase  
**Interventie** Psycho-educatie, psycho-education, nursing intervention, energy conservation  
**Comparator** Geen psycho-educatie, geen niet-nursing interventie met potentieel effect op de outcome measurements, geen energy conservation  
**Outcome** Vermoeidheid, kwaliteit van leven, (fysiek) functioneren

**Zoek strategieën:**

**Uitgangsvraag 5: Beweging/lichamelijke activiteit** Wat zijn de effecten van beweging/lichamelijke training op vermoeidheid, kwaliteit van leven en (fysiek) functioneren in vergelijking met geen beweging/lichamelijke training bij patiënten met vermoeidheid bij kanker in de palliatieve fase?

<b>Patiënten</b>	Patiënten met vermoeidheid bij kanker in de palliatieve fase
<b>Interventie</b>	Beweging/lichamelijke training
<b>Comparator</b>	Geen beweging/lichamelijke training
<b>Outcome</b>	Vermoeidheid, kwaliteit van leven en (fysiek) functioneren

#### **Zoekstrategieën:**
